SUMMARY

I am an innovative and results-driven **Front-End Software Engineer** with a strong passion for building seamless, user-centric digital experiences. I enjoy transforming ideas into interactive, scalable web and mobile applications. I have experience working with cross-functional teams to deliver high-quality products and solutions, and I am committed to continuous learning to stay current with the latest technologies and industry trends.

RELEVANT EXPERIENCE

Front-End Engineer
Papermap.ai – Remote / Ghana
July 2024 – Present

- I lead frontend development for the **Inventory Management Application**, building scalable and maintainable user interface components using **React**, **TypeScript**, and **Tailwind CSS**.

- I take on unofficial team leadership responsibilities by coordinating development tasks, mentoring team members, and conducting code reviews to maintain high-quality standards.

- I collaborate closely with backend engineers to ensure efficient API integration and a cohesive product experience.

- I lead key **user experience improvements**, such as simplifying interfaces, optimizing form flows, and enhancing component layouts to boost usability.

- I proactively identify and resolve bugs, streamline the debugging process, and contribute to overall system stability.

- I also leverage the power of **artificial intelligence tools** to boost productivity, automate repetitive tasks, and accelerate development workflows.

Front–End Engineer Intern
Carefusion Ltd – Remote / Ghana
July 2024 – January 2025

- I contributed to frontend development using **React** and **TypeScript** to build internal tools and dashboards.

- I collaborated with the engineering team to implement and refine reusable UI components.

- I utilized tools like **Notion** for effective task management and progress tracking.

- This internship helped solidify my practical frontend development skills and my ability to contribute in a collaborative, real–world engineering environment.

Front–End Engineer
Jackson Educational Complex – Remote / Ghana
August 2023 – Present

- I lead a team of three front-end developers in building a user–centric student portal using **React**, **TypeScript**, and **Chakra UI**.

- I collaborated with the team to redesign and normalize the organization's database for improved performance and scalability.

- I review code from peers to ensure consistency and stability.

- I implemented a **CI/CD pipeline** to automate and streamline deployment processes.

Front–End Engineer
Symliq Developers – Remote / Ghana
April 2023 – Present

- I collaborated with a team to develop the **web version of Acacia Health Insurance's application** using React, TypeScript, and Chakra UI.

- I facilitated peer programming sessions and conducted code reviews to enhance team efficiency and code quality.

- I partnered with Symliq and Apricot's design and engineering teams to build a cross-platform **financial mobile application** using **React Native** and **Node.js**.

- I was part of the team behind **Topbeary**, a mobile marketplace platform for new and used goods.

Software Developer (Freelance / Contract)
March 2020 – January 2022

- I worked with a team to build and launch a cross-platform **mobile application for Acacia Health Insurance** using **React Native** and **Django**.

- I collaborated with designers and Laravel backend developers to develop the **Aljani Vendor Portal**.

- I helped develop the **Cyalive Vendor Portal**, which enabled creators to upload and manage video content.

- I implemented a multi-language feature for the Cyalive platform.

- I co-built the **Regulus website and portal**, which led to a five percent increase in client profits.

EDUCATION

Bachelor of Science in Computer Science

Kwame Nkrumah University of Science and Technology (KNUST) – Kumasi, Ghana

---

TECHNICAL SKILLS

Languages:
 JavaScript (ES6), TypeScript, HTML, CSS/Sass, PHP, Dart, MySQL

Frameworks and Libraries:
 React, Redux, Vue, React Native, Chakra UI, Tailwind CSS, Bootstrap, Laravel, Node.js, jQuery, Webpack, Flutter, Shadcn

Tools and Platforms:
 Git, GitHub, Docker, JIRA, Bash, GitHub Actions, Notion, Trello

Methodologies:
 Agile, RESTful Services, Continuous Integration / Continuous Deployment
